Nov. 22 1747

TUESDAY, NOVEMBER 2. 1742.

Yesterday arriv'd a Mail from France.

Extract from the Paris Almanac, Nov. 7.

Extract of a Letter from Genoa, dated Oct. 24.

THE Duke de Montemar still remains here, and seems to be perfectly at his Ease, so that we hear nothing of his Departure; and as to that of the Count de Castillar, who it was expected should have gone before him, it appears to be still at a considerable Distance, since he is looking for a House in this City, that of the Spanish Ambassador at Carignan being too far off. The Return of a Courier from Madrid, with Permission from the Court to demand the Passports necessary for their Journey from the King of Sardinia.

Things seem to have chang'd their Face in Lombardy; for according to a Letter from Parma dated the 16th, the Austrians, who were advancing to meet the Spanish Army, in order to dispute its Passage, were actually retired on the Approach of the latter, and had fortified themselves along the Panaro, after having destroyed as far as was in their Power the Forrage collected for the Use of the Spanish Army. On the other hand, M. de Gages is said to be arrived with his Forces at Bologna; and a Report prevails, that the Austrians have begun their Retreat towards the Milanese, as have likewise the Piedmontese Troops for their own Territories. But this stands in Need of Confirmation.

L O N D O N.

The City of Abo, which is the Capital of Finland, is the Place made Choice of for the Conferences which are to be held between the Russian and Swedish Plenipotentiaries, under the Mediation of the Crown of Great Britain.

Some Letters from Moscow say, that her Imperial Majesty is inclined to give the Grand Duchy of Finland to his Royal Highness the Duke of Holstein in Property.

It is said Count Lewenhaupt and General Bodenbrock will be brought to a publick Trial.

Her Hungarian Majesty has been pleased to grant simply, and without reserve, all the Demands of the States of Transylvania, particularly those relating to Religion. Her Majesty has also declared Count Bathiani Ban of Croatia, which gave such high Satisfaction to the Natives of that Country, that 5000, who were on their March home, having received the News in Stiria, immediately faced about, and are marching with the utmost Diligence back into Bavaria.

Marshal Mallebois having intirely failed in his Design of joining Marshal Broglie, is retiring with his Army into the Upper Palatinate, and it is said has sent a Detachment of 17,000 Men into Bavaria. Marshal Broglie finding it inconvenient to return to Prague, set out for Dresden, and from thence will proceed as soon as possible to join the Army in the Palatinate, the Command of which he is to take upon himself.

His Royal Highness the Grand Duke of Tuscany having entirely defeated the Schemes of the French, as to their Junction, thought proper to detach the Prince of Lobkowitz on the 27th of Oct. N. S. to form once more the Siege of Prague; and in the mean time his Royal Highness has posted himself in such a manner, that it will be impossible for the Imperialists and their Allies to execute any Design upon Passau.

The Spaniards have entirely evacuated Savoy, where his Sardinian Majesty is resolved to have an Army of 25000 Men this Winter.

The Spanish Army in Italy have abandoned their Design of establishing their Winter Quarters in the Neighbourhood of Bologna, and are retired towards Tuscany.

On Saturday last a Dispensation passed the Great Seal to enable the Rev. Moses Terry, B. L. to hold the Rectory of Ledenhall in the County and Diocese of Lincoln, together with the Vicarage of Willingore in the said County and Diocese aforesaid.

The same Day a Dispensation passed the Great Seal to enable the Rev. Walter Walker Ward, D. D. to hold the Rectory of Biddenden in the County of Kent, and Diocese of Canterbury, together with the Rectory of Great Chart in the said County and Diocese aforesaid.

Yesterday was held a Board of Admiralty, when their Lordships were pleased to appoint Capt. Perry Main, of the Princessa, to be Captain of the Orford, a Seventy Gun Ship, in the Room of Capt. Dennison, lately deceased.

On Sunday last the Lady of Sir William Courtenay, Bart. Knight of the Shire for the County of Devon, (Daughter to the Right Honourable the Earl of Aylesford) was safely delivered of a Son at his House in Pall-Mall, to the great Joy of that noble Family.

The Honourable — Gage, Esq; Son of the Right Hon. the Lord Gage, and the Hon. — Lesley, Esq; Brother to the Earl of Rothes, are appointed Equerries to his Royal Highness the Prince of Wales.

Warrants are issued for apprehending the Son of a noted Gardener near Milbank, Westminster, for a most notorious, villainous, and scandalous Crime, viz. for ravishing two Daughters of a Publican in Rochester-Row, Tothil-fields, (the Eldest of whom was about eight Years of Age, and the youngest about three) and giving them the foul Disease.

Admiralty-Office, October 29. 1742.

THE Lords Commissioners of the Admiralty do hereby give Notice, That if any Able-bodied Landmen, not under the Age of Nineteen Years, nor exceeding Thirty-five, are willing to serve in any of his Majesty's Ships in the Ports of this Kingdom, if they will go to the Ports where such Ships are, they shall be well received, and enter into present Pay, and be allowed a Penny a Mile Conduet Money to the Ship they travel to serve in; which shall be paid to them as soon as they go on board.

Such as do not enter for any particular Ship, may apply to the Regulating Captains, at the Castle in Mark-Lane, who are directed by their Lordships to send them on board some of his Majesty's Ships in the Rivers of Thames or Medway: And such as live at distant Places may offer themselves to the Admiral, or Commanding Officer as any of the Ports, who will direct them what Ships to serve in, if they do not chuse themselves. And their Lordships do hereby strictly direct the Captains of his Majesty's Ships, not to refuse any Able-bodied Landmen who shall offer to enter with them, even though they have already their full Complement of Men; but to enter them on their Books for Wages, and to apply to the Clerk of the Cheque to pay their Conduet Money to them.

Tho. Corbett.

Hand-in-Hand Fire Office.

THE Directors give Notice, That a General Meeting of the Members of the said Society will be held at their Office in Angel-court on Snow-Hill, on Thursday the 4th Instant, by Three in the Afternoon: Where all who have insured are desired to be present.

N. B. The Election of Directors for the Year ensuing, by Ballotting, will be held at the same Place on this Day the Second, and Wednesday the Third Instant, from Nine in the Forenoon to Twelve, and from Three to Six in the Afternoon.

On Friday the 10th of December (at Five in the Evening) will begin

Dr. **BATEMAN's** Original and ONLY TRUE Wholesale and Retail WAREHOUSE at the Printing-Office, facing the South Door of Bow-Church, the Lower End of the Church-Yard, from Cheap-side, LONDON.

THE Daily Success which has constantly attended the Taking Dr. **BATEMAN's** PECTORAL DROPS, in the several Distempers of Colds, Coughs, Pains in the Breast, Limbs, and Joints, has gain'd them so universal a Character, that few Families care to be without them in their Houses. Besides the Distempers above-mentioned, there is no one Medicine, since the Discovery of the uses of Physick, that will give a Speedier Relief and Ease in all Rheumatick Pains, Gout, Stone, Gravel, Cholick, Fluxes, &c. Innumerable Instances might be given of the Happy Effects thereof, but we chuse to refer to a Book, call'd, *of Short Treatise of the Virtues of Dr. BATEMAN's PECTORAL DROPS*, given gratis, at the Warehouse above-said; where all Shop-keepers, &c. in any City, Town, or Village, where these Drops are not already sold, may be supplied, with good Allowance to sell again, by Directing or Sending to the PATENTEE,

BENJAMIN OKELL,
 Wm. and CLARA DICEY.

The Surprising Encouragement, which by constant Success, these most Valuable Drops have, for upwards of Twenty Years, met with, not only in Great Britain and Ireland, but in all Parts of the West-Indies, and other Foreign Countries, has lately induced several mean and mercenary Pretenders to Counterfeit them; and by imitating our Seal, Bill of Directions, and Show-Boards, with our Method of Advertising, as near as they can or dare to do, without making them the same; thereby impose their dangerous Compositions upon the unwary and credulous Shop-keepers both in Town and Country, for the True and Genuine Sort.

The PATENTEE and Company therefore, in Gratitude for the universal good Reception they have so long met with, and for the Safety of those who for the future may be desirous of using the same, think themselves absolutely obliged to give this necessary Caution,

Which they earnestly request may be observed,

THAT the Bottle they Buy is not only Sealed with the Boar's Head, but has also these Words round it, **BY THE KING'S PATENT**, as in the Margin; and also that the Names of the PATENTEE, *Benj. Okell, William and Clara Dicey*, be in the Bill of Directions given with each Bottle; without which you may be assur'd it is a notorious Counterfeit, and may be of the most dangerous Consequence.

N.B. That these DROPS are also sold Retail (as well as Wholesale) at the Warehouse aforesaid, at One Shilling the Bottle, containing three Doses.

This Day is published,
 (Price Five Shillings.)
THE Elements of ALGEBRA, in a
 New and Easy Method, with their Use and Application, in the Solution of a great Variety of Arithmetical and Geometrical Questions, by General and Universal Rules.
 To which is prefix'd, An Introduction containing a succinct History of this Science.

By **Mr. NATHANIEL HAMMOND, of the Bank.**

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper Introduction to Algebra. Some are so very concise, as if they were contrived not to teach but introduce a Teacher; others again are larger, but wrote with so little Condescension to the Understandings of such as are altogether unacquainted with the Science, that they are of very little Use to those who are most inclined to make use of them. Whence it comes to pass, that few find it practicable to make any Progress in Algebra without a Master, tho' certainly the Science in itself is far from surpassing a clear Head, and a tolerable Understanding.'

'The Design of this Treatise, which is of a reasonable Bulk, and which contains nothing which is not solid, and to the Purpose, is to assist such as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; so that their Scholars may find Employment in their Absence; and to enable such as live in Country-Places, and must consequently want all other Tutors, except Books, to acquire such a Skill in this Science, as may enable them to spend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiring after Truth habitual.'

'The Treatise begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation used therein. The Author then proceeds to the several Rules, explaining them carefully and copiously in all their various Cases; so that with a moderate Attention it is simply impossible for a Person, who desires to be Master of Algebra, to miss or his End.'

'We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become necessary: He professes to have imitated the judicious Euclid in this Respect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is usually the most fatiguing Part of the Science, viz. The Doctrine of Surds, in the Manner in which it is usually taught. By the same Means he leads his Reader directly to Equations; and, by shewing him the Profit he is to reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a strong and rational Foundation, he moves more slowly through the rest of his Work, that whoever follows him, may be obliged to become Master of ever Branch of the Art, so as to be a complete Algebraist, before he quits his Book, and not a Smatterer.'

'Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable Newton, are here so clearly explained, and their several Cases so plainly set down, and so thoroughly explicated, that it may be truly said, there are no where else such Instructions to be met with. At the Close of the Book, we find abundance of Observations, necessary for enlightening such Minds as are willing to proceed still farther in analytic Discoveries; so that considering the Compass of this Work, and that too is very moderate, it is as complete as possibly can be expected: And he who is thoroughly versed in it, will find no great Difficulties, when he proceeds to sublimer Studies. The Language is plain and natural, the Book is more copious than any other in Examples, and the Illustrations of them are so full and clear, that it is impossible to mistake their Meaning.'
